## SUPERVISOR

We are looking for a hands-on and compliance-driven Container Supervisor to oversee terminal operations within a fast-paced port environment. The ideal candidate will bring proven supervisory experience, a strong working knowledge of container handling, ISO standards, and terminal operating systems, and the ability to lead operational teams while maintaining the highest standards of safety and efficiency.

## Key Responsibilities

- Ensure all container handling, stacking, and movement operations adhere to SOPs, conducting regular risk assessments to mitigate operational and environmental risks.
- Lead, supervise, and motivate operational teams to ensure productivity, discipline, and adherence to safety standards across all shifts.
- Oversee Terminal Operating Systems (TOS) for real-time container tracking, ensuring terminal equipment is properly utilised and maintained.
- Ensure full compliance with international and local port regulations, including the ILO Code of Practice and the National Ports Act of 2005, as well as terminal operator license requirements relating to safety and staff competency.
- Enforce compliance with the International Convention for Safe Containers (CSC) and related national regulations.
- Uphold key ISO standards across operations, including correct container identification and marking (ISO 6346), safe handling and securing procedures (ISO 3874), structural integrity inspections and repairs (ISO 1496), and continuous improvement and quality documentation (ISO 9001)
